LOCAL PASTOR WILL ENGAGE IN HOME MISSION WORK

Rev. A. E. Larke, minister of the Central United church, Blairmore, has been invited to represent the Home Mission work of the Alberta conference of the United church in special meetings which are to be held in the fall in Eastern Canada, in connection with the celebration of the tenth anniversary of Church Union. Word to this effect was received by wire last week from Drs. Peter Bryce and R. B. Cochrane, both of whom have

been visitors to The Pass in recent years.

He will probably leave some time in October, and be away for about four weeks. Arrangements will be made to supply the work at Blairmore in his absence.

Mr. Larke has been minister in the Crow's Nest Pass since 1930, having served at Coleman prior to his coming to Blairmore. For several years he has held the position of convenor of the Missionary and Maintenance Fund for the Lethbridge Presbytery, and was recently elected secretary of the same presbytery.

CASTLE RIVER CLUB STAMPEDE TO OPEN NEW CROSSING AT SEVENTH AVENUE

It was Derby Day on Wednesday, the 17th, at Beaver Mines. All roads led to the beautiful sports field under the upper bridge of the South Fork, following direction signs at every turn from Pincher Creek to Burns and from Cowley to Cardston. The weather kept fine, although it threatened (or promised) in the morning to rain, but nothing short of a cyclone would keep people away from Castle River Stampede, it has become so firmly established in popular favor. It is estimated that the attendance exceeded 3000. The long grassy bank, which serves as a natural grandstand, was entirely taken possession of by the time the rodeo events started. Before that, foot races, ball games and a saddle horse parade were the order. It looked as if the whole Peigan Indian tribe were present. They had encamped over night across the river. The colorful gowns gave a picturesque touch to the gay crowd which lined the bank, above which hundred of cars were parked. From the front row of cars an excellent view was had. The Pincher Creek band contributed to the festive spirit and delighted everybody except a "sheen" Scotchman. Bill Barclay said the haggis he had brought for lunch didn't taste "right" without the bagpipes accompaniment. He and Mrs. Charlie Mitchell were afterwards heard "speakin'" in McMurdo if he wadna put on the kilts and gie us a skirl on the pipes. McMurdo is the bandmaster, ye ken.

There was a good gathering of old timers. Some of them noticed in the horseshoe tournament were Bob Lang, George Ballantyne, Heeky McDowell, Tom Smith, Fred Link, George Smith, Jim Macleod, C. H. Tench, Bill Lynch, Bob Henderson and Wash Mitchell (the winner). We missed our veteran compunctioner, Joe Johnson, who was in hospital for an operation. It was a time for meeting old friends and making new ones.

The refreshment booths, under Jack Gola's direction, did a roaring business, and picnicking was enjoyed both in cars and under the trees by the river.

All five provincial parliamentary candidates were there, but they got so engrossed with the sport they forgot to do any vote canvassing.

The rodeo events and horse races were carried on alternately in rapid succession, and continuous interest was sustained all through the afternoon—in fact, a few brief intervals which would have been a welcome relief to tired eyes.

Dr. Brayton and a nurse were in attendance; also we were glad to see our old official doctor, Walkerly, who has been invalidated. There were no accidents, however, that were serious enough to require medical aid, although there were more frequent spills and thrills than usual. Many extra good bucking horses had been brought in from far and near. Some of the well known riders who had got into the money division at Calgary, were thrown. A Calgary stampede official said that those grain-fed black steers of Lang's put up a better show than any at Calgary. The rip-roaring wild cow milking contest brought out a very large field. The calf roping also, and an exhibition of trick roping was given by Roy Seward, of Golden, B.C. The horse races brought together some very fast horses, and close finishes were the rule. The nearest approach to a serious accident happened when little Archie Eddy, in the boys' race, was pitched over the rails when his horse suddenly swerved to a gateway. He was unhurt, however, and pluckily remounted to run over again. This was fortunately no west wind this year to blow up the dust from the track.

Wilbur Lang was in charge of the horse races, Wal Eddy was starter

We understand that the town council of Blairmore has received word from the Board of Railway Commissioners, to the effect that their request for the opening of a new railway crossing at Seventh Avenue has been approved, and that the C.P.R.'s end of the work will shortly commence.

It is hoped that by opening a central crossing at Seventh Avenue, much will have been accomplished toward eliminating the dangers of negotiating the present crossing at the immediate east end of the railway platform on Fifth Avenue.

Fifth Avenue crossing has been a sore spot to those having occasion to cross that way by motor vehicle for a considerable time. Approaching from the south, when a number of box cars occupy the sidings, it is just about impossible to see a train approaching from the west, and coming from north a similar condition on a smaller scale is experienced. With the opening of the new crossing, one track instead of three would be crossed, while a motorist or pedestrian would have a clear view of the tracks east or west from both sides.

Naturally, the new undertaking will necessitate a revaluation of certain properties for assessment and taxation purposes.

No word is given as yet as to whether or not it is intended to close Fifth Avenue crossing to vehicular traffic. In any event, it is expected a foot path crossing at that point will be maintained.

and Harvey Bossenberry, M.L.A., was judge. Pete Legrandeur was manager of the stampede. Bert Conneller, Carl Smith and Gordon Leonard were judges (Where was Jimmy Miller?). Frank Corrigan was in charge of the foot races and ball games.

The open air dance at night was on a board floor in a riverside glade, and about 500 people danced to the music of Cirdland's orchestra.

The committee hereby tender their thanks to those storekeepers in Blairmore and Pincher Creek who donated prizes.

The prize winners were as follows, given in order, first, second and third:

Brone riding with saddle—Pete Beaudoin, Happy Valley Kid, O. K. Land.

Brone riding, loose rope—Frank Beaudoin, Sam Andrews.

Steer riding, men—Ken Hassett and Frank Ross divided first and second.

Steer riding, boys—Walter Sapeta, Dave Troutt.

Wild cow milking—Billy Genep, Del Lybhardt.

Best bucking horse—Ted Jones, first and second.

Chuck wagon race—Jack Crowshoe, Joe Crowshoe.

Calf roping—Eddie Burton, Nor-

man Porter.

Buggy race—Jack Crowshoe, Phil

lip Big Swan.

Relay race—Phillip Big Swan, Jim

Little Leaf.

Stake race—Eddie Burton, Ted

Jones.

Mile open—Neil Cameron, H. Con-

nor.

Five-eighths open—Neil Campbell,

H. Cohen.

Half-mile Indian—A. Goodrider,

Sam Provost.

Mile Indian—Sam Provost, Alfred

son, of Hillspire; J. Conner, Maple

HILLCREST MINERS TO STAGE CARNIVAL

Bills are out announcing a big two-

day carnival to be held at Hillcrest

on August 10th and 12th under the

auspices of the Hillcrest Miners' Lit-

rary and Athletic Association. The

regular carnival programme will be

carried out each evening, commen-

tating at 7 o'clock. A dance floor has

been borrowed from the Blairmore

Elks and jitney dancing will be a big

feature. The Mellow Rhythms will

furnish music.

On the Saturday evening, a tug of war tournament will be staged, open to teams between Coleman and Maple Leaf inclusive.

Fifth Avenue crossing has been a sore spot to those having occasion to cross that way by motor vehicle for a considerable time. Approaching from the south, when a number of box cars occupy the sidings, it is just about impossible to see a train approaching from the west, and coming from north a similar condition on a smaller scale is experienced. With the opening of the new crossing, one track instead of three would be crossed, while a motorist or pedestrian would have a clear view of the tracks east or west from both sides.

Naturally, the new undertaking will necessitate a revaluation of certain properties for assessment and taxation purposes.

No word is given as yet as to whether or not it is intended to close Fifth Avenue crossing to vehicular traffic. In any event, it is expected a foot path crossing at that point will be maintained.

The committee in charge hope to

make this two-day undertaking the

biggest yet.

See bills for further particulars.

WORLD HAPPENINGS BRIEFLY TOLD

Great Britain has apportioned more than \$25,000,000 to maintain her security by strengthening her air defence.

More than 1,000 settlers have been established in various parts of Quebec under the \$10,000,000 colonization plan, Hon. Ernest Vautrin, Quebec minister of colonization, stated.

Single men able to work and refuse to help farmers with their harvest, will lose their city relief allowances, Mayor G. Wilton of Hamilton has announced.

In Toronto Judge James Parker criticized the Canadian Performing Right Society for keeping the public "in the dark" to its tariff for the playing of "protected" music.

Postures of stem rust were found in wheat in the University of Saskatchewan's grain fields. Garnet wheat, which has little resistance to the fungus, showed most of the infestation.

A heavier tonnage of merchant vessels is under construction in the world than at any time since 1932, Lloyd's quarterly report revealed. Germany leads the world outside of Great Britain, with 237,000 tons under construction.

Manitoba was 65 years old on July 15. The province was created and admitted to the Dominion July 15, 1870, though it was not until Sept. 2 of the same year that Manitoba was officially considered a unit of the Dominion of Canada.

Vancouver Island lumber mill managers have received from export sales organizations copies of the last batch of lumber orders from Japan to this continent. Each order has the notation: "Not to be supplied from mills in Canada."

China Goes Modern

Campaign Against Footbinding In Peiping

A campaign against footbinding in the city of Peiping has been launched by Yuan Liang, famous in China as the "blue law" mayor of Peiping. Six regulations have been devised governing the execution of the movement.

The first regulation is that girls under 15 will not be allowed to bind their feet. Those that have already done so are ordered to unbind them immediately. Women between the ages of 15 and 30 who have their feet bound are given three months in which to unbind them. Women over 30 are permitted to unbind their feet at their leisure.

Failure to observe the new regulations results in a fine not to exceed \$10 in Chinese money (\$4 in Canadian) for the first warning, but if warned a second time the fine automatically becomes \$100 in Chinese money, or about \$40 in Canadian currency.

Bird Refuses Freedom

Prefers To Stay With Convict Who Benefited Him

Squegee, the bird in an unglided cage, had his chance at a pardon from Stateville Prison in Joliet, Ill., but scorned it for his steel and concrete home in cell block C.

The manner in which Squegee eschewed liberty brought a snuff to John Post, 60-year-old convict, who has been Squegee's master, confidant and cellmate since a day in 1933 when he found the horned lark fluttering in the prison yard and tossed the lark into the air.

Post, sent up for burglary, mended the fracture and spent his last \$1.50 for bird seed. Squegee moved into Post's cell.

But Post has still a year "in stir" and suggested to Warden Whipp that Squegee should get his pardon. Accompanied by the warden, the old man went into the yard and tossed the lark into the air.

Squegee soared over the wall—but flew right back to Post's shoulder. "I'll keep him," said Post.

Priest Drowns In B.C.

Father E. Allard, O.M.I., one of the best known padres in the remote north country, was drowned at Cotton Woods rapids, in the upper Stikine river district of British Columbia, it was stated in advice to provincial police headquarters. The news was brought by Bishop E. M. Bunoz, O.M.I., spiritual head of Roman Catholics in northern British Columbia and the Yukon, with whom Father Allard was travelling.

The British Museum has a piece of iron taken from the Pyramid of Gizeh, which is believed to date from 400 B.C., and an axe head of Egyptian manufacture dating from 1700 B.C.

Has Undertaken Big Task

Pacific Island Native Wants To Translate Bible For His People

Kata Rangosa, son of a former headhunter and cannibal, is going to try to translate the Bible into the native language of a group of Pacific Islands in the western Solomons.

As these natives have a spoken language, that has never been written down in any form, his task looks at first sight to be tremendous. But it is an amazing fact, a reporter discovered, that some of the native tribes have vocabularies that are far bigger than those of most educated Englishmen.

The Rev. Edwin W. Smith, of the British and Foreign Bible Society, who spent 18 years among natives of Africa, said he discovered that natives often had a vocabulary of some 10,000 words—nearly as many as Shakespeare used, and you could listen to natives talking for ten years and rarely hear a grammatical mistake.

Even university men here often made such errors as "between you and I" but analogous mistakes of that kind were seldom made by the African natives, though they could not write or read a word, and had no formulated rules of grammar.

Mr. Smith described the astonishment of the natives when he showed some of them what "writing" was. One day he was in a forest cutting a tree, and he wrote a note to his wife asking her to send an axe. This note was taken by a native boy who knew an axe was wanted.

But when he saw Mrs. Smith look at the paper and straightway fetch the axe he demanded why she had suddenly jumped to the conclusion that the piece of paper had been "speaking" and was full of the most wonderful "magic". "Making the paper speak" became the term for "writing."

How the native children—raw material, as it were, of civilization—react when their care-free life is suddenly changed, and they are brought to school and taught, for the first time in the history of their race to write?

Mr. Smith found that they are very quick-brained, and just in the early stages probably just as quick at learning as English children, whose ancestors may have been wranglers.

Find Underground Chamber

Believed To Be Torture House Of Ivan The Terrible

Moscow excavators have announced they have discovered the underground chamber where Ivan the Terrible was said to have tortured his victims nearly four centuries ago.

Definite proof was declared to have been obtained that a chamber and passage found beneath the centre of the city near the spot where the Lenin library is under construction was Ivan's dreaded "Henchmen's Court."

There, according to the stories told in Russia, Ivan had his victims torn to pieces by bears and sometimes buried alive.

The subways diggers came across it last winter upon investigating while sand discovered under a razed dwelling. Archaeologists said the sand had been brought from some distant place. Further digging led the workers to the remains of a court and passages which once connected it with the Tsar's palace.

Ivan is popularly supposed to have ordered the construction of the underground passages in 1565 so that he could watch his henchmen torture the victims. The German adventurer, Heinrich Staden, known as the underling of Ivan, wrote memoires in which it was said that the courtyard was damp and that Ivan, consequently, had ordered it covered with sand.

To Consolidate Friendship

War Veterans From Britain Pay Visit To Berlin

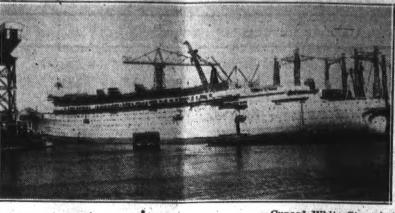

Five war veterans sent by the British Legion arrived in Berlin recently for a 10-day visit with the men they faced across No Man's Land.

Led by Major Fetherstone Godly, the Britons were sent to sound out the possibility of sending a larger group of veterans to Berlin as a further movement to reconcile old front lines. The visit also was connected with a German effort to consolidate friendship with England.

Matches, no doubt, cause plenty of bare fires, but farmers have seen enough hot mows to know there is a fire hazard there as well.

Symbol of all things firm and strong, the Rock of Gibraltar is now chainied up to keep its summit from toppling into the sea. 2108

CUNARD WHITE STAR LINER "QUEEN MARY"

—Cunard White Star Liner.

Here is the giant Cunard White Star liner "Queen Mary" as she now looks in her fitting out basin on the Clyde. Recently the Clyde celebrated the 95th anniversary of the maiden voyage of the pioneer Cunarder "Britannia" from Liverpool to Halifax and Boston. The voyage commenced on July 4, 1840.

Motion Picture Industry

Launching Big Production Programs For Current Year

The motion picture industry is launching its biggest production program since the bumper year of 1927-28 and it may even come up to this period.

Upwards of \$150,000,000 will be spent on film making in the coming season, 95 per cent. or more of the total in California. Some will be expended in Great Britain by American companies.

Double feature programs, current in the great majority of theatres, will necessitate the production of more films than ever before, for there is a shortage now.

Pictures whose cost will range upward to \$1,000,000 each include "Midsummer Night's Dream", "The Crusades", "Tale of Two Cities", and "The Last Days of Pompeii", among others.

Ruled By Foreigners

Only One Of Europe's Dictators Is Native Born

Most of Europe is now ruled by dictators. Strangely enough, most of these dictators are not natives of the countries of which they are absolute rulers. Adolf Hitler of Germany, for example is an Austrian by birth; Mustapha Kemal of Turkey, is a Greek from Salonika; Joseph Stalin of Russia was born in Asiatic Georgia; Emano De Valera of Ireland was born in New York City; the late Jose Pilsudski of Poland was a Lithuanian. Only Mussolini, among the more important dictators of Europe, is a native of the country he rules. He was born in Dovia, Italy.

A Friendly Tip

During the day, Mrs. Brown discharged her old maid and hired a new one, who answered the door bell when Mr. Brown arrived home in the evening. He carried a bunch of roses, which he handed to the maid, saying: "Give these to Mrs. Brown, and tell her I want to see her at once."

"All right," said the maid, "but you better make it snappy, because she expects the old man any minute now."

In 1930, the United States 22,600 movie houses sold \$1,500,000,000 worth of admission tickets.

A Profitable Hobby

Stamp Collecting Very Often Brings Money To Owner

Many so-called "be men" look upon the collection of stamps with disdain. They classify it as a hobbypamphy hobby on a par with whist or checkers.

Philatelists, on the other hand, are quite pleased up with a plumb line in his hand standing before a crooked wall and measuring it. As far off from rectitude as the crooked wall is the Kingdom of Heaven.

Professional dealers, nearly a thousand of them from most parts of the world, walked around, talked, examined and purchased. Most of the dealers seemed anxious to do business with sheets or rows of stamps rather than with single specimens.

The most valuable specimen was the Black British Guinea one cent, which brought more than \$35,000 to its owner.

Stamp-collecting may seem like a nonsensical hobby, but the evidence furnished by the London show certainly proves it is a profitable one.—Port Arthur News-Chronicle.

Retains His Popularity

Prince Of Wales Will Always Be Charming Person

At 41 the Prince of Wales is still an interesting and popular figure, though the charm of his youth has inevitably departed. As a young man he captured all hearts much as Bonaparte's Prince Charlie did. But his has been a happier lot than that of his brother the Duke of Gloucester.

From his early travels he brought back a mature conception of duty, which at home he has studied closely the lives and fortunes of the British people. That he has never married is a disappointment. But this is a detail. No heir to the throne has more faithfully fulfilled the obligations of his position.—Philadelphia Inquirer.

Getting all excited over a spell of bad business units a man for good work.

A protein's quality is measured by its ability to build body tissue.

Household Arts

PATTERN 5395

If you want to make the most of your time, make this jiffy knit. Large needles and a heavy thread (candlewick, that very heavy cotton, or German moss) can be got done in no time. The entire pattern is in one page. You have only the side panels set. The narrow yoke connects effectively with the closer stitch of the body of the blouse. As you can see in the detail, the stitch of the blouse has the effect of stripes. The blouse, lovely for summer, will be very practical for fall and winter, too, short sleeves. It can be worn with a belt. Directions for a plain knitted skirt come with the pattern.

In pattern 5395 you will find complete instructions for making the blouse shown and the skirt in size 16-18 and 36-40; an illustration of it and of the stitched needed; material requirements.

The pattern is sold 20 cents in stamps or coins (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg.

There is no Alice Brooks pattern book published.

SUNDAY SCHOOL LESSON

JULY 28

AMOS (Prophet Of Social Justice)

Golden text: Let justice roll down as waters, and righteousness as a mighty stream. Amos 5:24.

Lesson: Amos, Chapters 4 and 7.

Devotional Reading: Psalm 7-13.

Explanations And Comments

Three Visions Of Jehovah. Amos 7-9. Amos, the prophet from Judah, has gone to Bethel, the capital of the Northern Kingdom of Israel to warn them that the nation is ripe for judgment. He tells them of a series of visions in which God has revealed to him what is to come to pass. He describes a plague of locusts devouring the vegetation, but God stayed his hand against the people when Amos cried, "O Lord Jehovah, forgive thy people."

Next he had a vision of a terrible deep, the underground ocean on which the Hebrews imagined the earth to rest, had risen up, and the springs and fountains were being burnt up by the sun's scorching rays. Again the prophet prayed, "O Lord Jehovah, cease to beseech these."

His third vision depicts Jehovah with a plumb line in his hand standing before a crooked wall and measuring it. As far off from rectitude as the crooked wall is the Kingdom of Heaven.

It is a very remarkable fact that water will fail to form new substances, which it knows, as chemical compounds, they lose completely their own properties. An excellent example of this is common sodium (a soft, silver metal which reacts violently with water to produce hydrogen) and chlorine (a greenish-yellow, poisonous gas). In chemical compounds, they form salt, a white compound which is necessary for our diet.

Some common elements occurring in nature are gold, platinum, copper, oxygen, nitrogen, iron, etc. Most of the elements, however, are combined with others in compounds, and it has been found necessary to decompose the sun to obtain them. Most of the elements which occur in nature are gases and only two, mercury and bromine, are liquids under ordinary conditions.

Although there are 92 elements, only about 20 of these are at all common and important. Moreover, it has been calculated that about 98 per cent. of the earth's crust is composed of only eight elements. These are oxygen (50%), silicon (26%), aluminum (7.3%), iron (4.2%), calcium (3.2%), sodium (2.4%), potassium (2%) and magnesium (2%).

The spectroscope, an instrument invented by the scientists for the detection of chemical elements, has enabled man to study the composition of the world is rapidly approaching completion at the Victoria University, Manchester. In the space of ten minutes it will be able to dispose of problems which would keep even the most quick-working of human mathematicians busy for two days. It will never get tired, never misread its own figures. Sheer lack of time may compel the most conscientious mathematician to make "second-best" approximations. This robot mathematician has no need to "cut corners." Professor Hartree, its inventor, wants to probe into the unsolved mysteries of the atom, of the travel of radio waves, and of aeroplane flight with the aid of this robot.

Will Not Cut Corners

Machine Which Is Wizard At Mathematics Nearing Completion

A machine which can beat the combined efforts of 50 finest mathematicians of the world is rapidly approaching completion at the Victoria University, Manchester. In the space of ten minutes it will be able to dispose of problems which would keep even the most quick-working of human mathematicians busy for two days. It will never get tired, never misread its own figures. Sheer lack of time may compel the most conscientious mathematician to make "second-best" approximations. This robot mathematician has no need to "cut corners." Professor Hartree, its inventor, wants to probe into the unsolved mysteries of the atom, of the travel of radio waves, and of aeroplane flight with the aid of this robot.

Would Be Gladly Welcomed

British Working On Signal To Eliminate Telephone Waits

In response to a long-felt want the British Post Office is said to be experimenting with a signal which will enable the caller to lay aside the instrument while waiting for the call. It is to be a different click from that breaking connection and, from its double sound, will be called the "cuckoo." Such a click is needed is shown by many letters in the London Times, one of which reads in part: "It seems extraordinarily clumsy that people have to hold on, often for several minutes, unable to pursue any other occupation, because no one can invent some method by which the telephone shall give tongue when the receiver at the other end is taken up again. I suppose that many hours a day are wasted in this tedious and empty employment of standing or sitting with a receiver to the ear waiting for the required voice."

A Royal Business Man

Lord Gordiswoode, son of Princess Beatrice, and a grandson of Queen Victoria, is not in receipt of any pension from the State, says the News of the World. He has to earn his livelihood, and is a director of several companies, including Lever Bros. He was trained for business as a clerk in the merchant banking house of Lazard Bros., and while there did the ordinary day's turn from 9:30 to 6 just like the other clerks.

If the conceit were taken out of some people there would be nothing left to bury.

Leprony reached America from both Europe and Africa.

Little Journeys In Science

THE BUILDING STONES OF THE UNIVERSE

(By Gordon H. Guest, M.A.)

Scientists have discovered that in decomposing certain materials by electricity, one always finds substances which resist all efforts to decompose them. These materials are usually decomposed into simpler substances which are known as elemental elements. At the present time 92 of these simple and fundamental forms of matter have been discovered.

Water can be decomposed by electricity into the gases hydrogen and oxygen. Red oxide of mercury can be decomposed by heat into mercury (quicksilver), which is a liquid, common salt, under certain conditions, yields the metal sodium and the green-yellow gas chlorine. Other substances decompose into iodine, sulfur, carbon, nitrogen, oxygen, silver, silicon, aluminum, and gold.

In recent times scientists have discovered that certain substances, which are radioactive elements, decompose spontaneously into other elements. The chemist has no control over these changes. This fact is illustrated in the metal radium, which decomposes into helium, radon, and radium, which are a number of other elements such as helium, radon, and lead.

It is a very remarkable fact that water will fail to form new substances, which it knows, as chemical compounds, they lose completely their own properties. An excellent example of this is common sodium (a soft, silver metal which reacts violently with water to produce hydrogen).

Some common elements occurring in nature are gold, platinum, copper, oxygen, nitrogen, iron, etc. Most of the elements, however, are combined with others in compounds, and it has been found necessary to decompose the sun to obtain them. Most of the elements which occur in nature are gases and only two, mercury and bromine, are liquids under ordinary conditions.

Although there are 92 elements, only about 20 of these are at all common and important. Moreover, it has been calculated that about 98 per cent. of the earth's crust is composed of only eight elements. These are oxygen (50%), silicon (26%), aluminum (7.3%), iron (4.2%), calcium (3.2%), sodium (2.4%), potassium (2%) and magnesium (2%).

Common elements occurring in nature are gold, platinum, copper, oxygen, nitrogen, iron, etc. Most of the elements, however, are combined with others in compounds, and it has been found necessary to decompose the sun to obtain them. Most of the elements which occur in nature are gases and only two, mercury and bromine, are liquids under ordinary conditions.

Thus science has revealed that all materials, from salt to star dust, are built of these simple and elemental forms of matter known as elements.

Recipes For This Week

(By Betty Barclay)

AMBASSADOR STRAWBERRY TART

1 cup cream, whipped
1 egg white, stiffly beaten
1/4 cup sugar
1/2 teaspoon vanilla
1/2 cup molat, sweetened sliced coconut
1 cup sweetened sliced strawberries

berries

6 baked 3 1/4-inch tart shells
Combine cream, egg, sugar, vanilla and 1 cup coconut. Place strawberry mixture in bottom of tart shells, pile coconut mixture on fruit, and sprinkle with remaining coconut. If desired, place one whole strawberry on each tart before sprinkling with coconut. Serve at once. Serves 6.

RED RASPBERRY JAM

4 cups (2 lbs.) prepared fruit
6 1/2 cups (3 1/2 lbs.) sugar
1/2 cup fruit pectin

To prepare fruit, crush or grind about 2 quarts fully ripe berries. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Then stir and skim for turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin at once. Makes about 10 glasses (6 fluid ounces each).

Veterans Send Wreath

Prime Minister Lyons of Australia while in Ottawa paid tribute to the Canadian soldiers who lost their lives during the Great War. He visited the peace tower in the parliament buildings and laid a wreath on the Altar of Remembrance. The wreath was made by Australian war veterans as a token of respect for their Canadian comrades in arms who died in the war.

Leprosy reached America from both Europe and Africa.

MISS ALADDIN

CHAPTER IX.—Continued

"Walk straight up the road till you meet my house and see a path lead into the woods. It's terrible steep, and I ain't attempted it for years, though Tubbs and I got engaged to be married up there under the old pine. You'll find our initials cut in the bark with a heart around 'em. Victor Tubbs is a real good carver. If you run into anybody from the Adam ranch, Nancy, tell 'em we'll want extra milk to-morrow. And would you mind peekin' in my bedroom window and see if Tubbs is sleepin'? He's got a delicate stomach, and his supper didn't set good last night."

Suppressing a smile at this unique request, Nancy promised, and started on her way. The afternoon was all alone, and it was impossible not to feel a thrill at the unbelievable December day. The sun was warm; yet the paper reported a blizzard raging in New England! It seemed incredible; and next week, Nancy mused regretfully, the Country Club would be gay with winter sports.

"I wouldn't be there anyway," she confided to herself, as the homesickness she had supposed vanished, raised its head again. "I'd be at Edgemere wiping dishes for Mother or mopping up puddles of snow brought in by Phil. Here's the Tubbs abode already. I must see if Victor's asleep."

This brought a smile, and home-sickness refuted to that place where such things go when we forget ourselves. Aurora's house which set back a space from the road, was a one-story affair covered with tree-bark, and almost hidden in a grove of stunted pines. Nancy went softly up the path and peered in at a window. By pressing her face against the glass she made out an ornate iron bedstead on which the recumbent Tubbs was snoring peacefully; while one of his wife's rich layer cakes and an open jackknife stood on a nearby chair.

Thinking of Victor's "delicate stomach," the girl chattered him away. "No wonder his supper failed to digest! Should she tell him of it?" Nancy decided against this, but vowed that Cousin Columbine should hear the story. It was too good to pass.

She still smiled as she resumed her walk; but that path into the woods seemed to elude her. Concluding that she had missed it, Nancy stepped aside to escape the dust from an approaching truck, and recognizing the hateless figure of Matt, he Adam, hailed him as he was about to pass.

Although on pretext or another, Mark had dropped in almost every day of the past two weeks Nancy had not seen Matthew since his blushing exit after colliding with Aurora's Tubbs. He was blushing now, the girl observed, and wondered if it were the same blush, or a new one for her especial benefit? She said, as a shy smile hovered across his face, on recognizing her: "Sorry to make you stop if you're in a hurry, but Aurora wants more milk to-morrow. And will you show me how I can reach that hill? I've lost my way."

As Matt slid lightly from the truck to stand beside her, Nancy was again impressed with the young man's appearance. His blush had

ITCHING TORTURE
Stopped Instantly

D. D. Prescribes Speedy Relief

Even the most stubborn itching of eczema, pimples, mosquito or other insect bites, rashes and many other skin afflictions can be easily stopped by this cooling, liquid antiseptic D. D. Prescription. The world-wide success of this product is due to its power in stopping the inflamed tissues. No fuss—no mess. Clean, greaseless and stainless. It dries quickly and immediately. Try D. D. Prescription now. Steps the most itchy地方 instantly. A 35c trial bottle is always given free. Send today to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALSAM.

subsided; but something told her that he was struggling with embarrassment and furrows with himself because of it.

"You should have turned off just after you passed Aurora's," he told her, "but it's no wonder you missed the trail, so few go that way. It's an easier climb from the other side. If—if you don't mind riding on the truck I'll take you round."

He was blushing again. Nancy caught the idea that he had forced himself to make the offer out of politeness, and thus responded: "Aren't you too busy?"

"Not busy at all; but this truck is second cousin to Methuselah, and—"

Nancy laughed.

"You needn't apologize for the truck! I'm tickled to go for a ride in anything at all. My feet have had plenty of use since I struck Pine Ridge; but that hill tempts me, and the day, too. Isn't it glorious?"

With Matt's assistance she had reached the crest, and said as they backed around: "It's far to the other side of the hill."

"A couple o' miles, maybe."

"Miles! Why I thought it was only a step!"

"To the top of that hill? Well, it's not much more, from here; but it's pretty steep, and we can ride half way up from the other side. My mother used to take us there on picnics when we were kids."

Seeing that the young man's embarrassment had dropped away when he spoke of his mother, Nancy grasped the cue.

"Cousin Columbine tells us that Mrs. Adam is—well, what she said was: 'Eve Adam is a grand success as a mother!'"

"I'll say she is!" Matt faced her, smiling, and Nancy saw that he had completely forgotten himself at last.

Then the color dyed his face again and he stammered awkwardly: "I—I don't mean that we boys have turned out anything above the average; but—but that."

"I know what you mean," smiled Nancy, coming to his rescue, "though I think Cousin Columbine meant just what you're denying. It must be nice to have such enviable reputations! How did your mother manage it with all four of you?"

She couldn't resist teasing him a little, but it was kindly tact which made her bring the conversation back to his mother; and Matthew answered: "By being herself, I guess. She was being all hand, you know, so perhaps we didn't get into as many scrapes as some kids. Mother's a wonder; and Dad is too. I'm rather crazy about my people, but—but I've said enough. Don't know what got me going or—"

"I got you going!" admitted Nancy, twinkling lighting her blue eyes. And then: "Oh, look! Is that a snow-capped mountain range on the horizon?"

Matt nodded. "Here's where we turn. Do you mind a little cross-country riding in this old wreck? You're likely to get some jolts, but—Look out there!"

This warning was too late, and only a quick snatch of Matthew's arm which brought her tight against his khaki coat for just a minute, kept Nancy from losing her balance, as they dipped into a rain-worn gully. When he released her and the girl looked up, she saw that all his previous confusions were as nothing compared to the embarrassment that engulfed him now. This amused sophisticated Nancy, and she said demurely:

"Thanks for saving my life! Is that another of those pleasant little thank-you-ma'amns looming up ahead? If you'll tell me when our approach—It'll hang on tight and save you the trouble of rescuing me a second time."

"It—it wasn't a bit of trouble," stammered Matthew. "I mean—I didn't in the least mind—I—"

"I'm glad to know that the experience wasn't unpleasant," broke in Nancy, her eyes dancing. "Do I get out here?" (as Matt, his face the color of a peony, stopped the engine). "And do I keep straight on until I reach the top?"

"I'd better show you the way, hadn't I? That is—unless unless you'd rather go alone. I—I don't want to butt in if—"

"Oh, come on," laughed Nancy. "I wasn't keen on solitude, if that's what you mean. And if you've got time to play around for an hour, nothing would please me more. Jack was vanquishing a wood pile; Cousin Columbine was napping, and Aurora was too much inclined to give advice, so I ran away."

Matthew laughed softly. It was a pleasant laugh and his voice was pleasant too, though Nancy, when he forgot himself and spoke naturally,

"Aurora Tubbs strikes me as completely dumb," he told her; "and advice is one of her strong points. She's never recovered from going to college—thinks it was the last word in foolishness. What's she found to pick at about you?"

"Stockings!" said Nancy, and wondered if Matt, following close behind in the narrow path, was blushing again. "My sport hose got left at home, and she implored me to borrow a pair of Cousin Columbine's 'black cottons.' Honestly, I didn't know till I saw Cousin Columbine the day we came; that cotton stockings were manufactured any more."

"They're growing scarcer all the time," said Matthew gravely. "Even in Pine Ridge there's not much call for 'em; and the high lace boot is doomed."

Nancy whirled about. This was the strangest young man she had ever come across. One moment he stammered with confusion, and the next was saying something as amusing as it was unexpected. Their eyes met as she turned, and they both laughed, and laughing, felt better acquainted.

"I wonder," remarked the girl as she started forward, "where Cousin Columbine gets hers?"

"You mean the boots?"

Nancy nodded because the trail was steeper here, and she found herself a little short of breath.

"Maybe she gets 'em where she gets the middies," suggested Matt.

"Slow down, Miss—er—"

"Don't be Victorian," said Nancy, without turning. "Was I going too fast?"

"Too fast for your own good, at this altitude. It takes time to get acclimated when you're transplanted from sea level. Has your brother found a job?"

"Not yet; and he's pretty worried. Oh, just look at the Peak! And—why I never imagined such a view. I didn't know there was anything like it in the world!"

Matt beamed, as pleased with her enthusiasm as if he were responsible for the view himself.

"Keep on," he told her, "till you reach that old pine that's been struck by lightning. That tree is practically on the summit; and there isn't a finer view for miles."

"How could there be?" Nancy asked breathlessly at the foot of the ancient tree. Plains, and mesas, and mountains stretched before her, behind her—over every side, valleys that would be green as emeralds in summer; deep, gorge; snow-capped peaks. "It's almost too beautiful to be true," she said at last. "Why has no one ever built a home here on this spot?"

Matt tapped the scarred old tree trunk, shaved clear of bark where lightning had done its work.

"A house would be too good a target! This is the highest point in several miles. Are you afraid of thunder showers? If so, you'd better pack your trunk before the middle of May!"

"Are the showers bad?" (To Be Continued)

Depends On Soldiers

Ethiopia May Lose Services Of The Red Cross

The administration of the Red Cross may be withheld from Ethiopia in case of war with Italy because Emperor Haile Selassie has so far been unable to give his word that his soldiers will not mutilate captives, according to Field Director T. A. Lambie of the Ethiopian mission service. Dr. Lambie explained the Emperor could not "sincerely" pledge his word in this regard because of the almost uncontrollable ferocity of some Ethiopian frontier tribes. The mission director is trying to organize in London an ambulance corps for Ethiopia.

It—it wasn't a bit of trouble," stammered Matthew. "I mean—I didn't in the least mind—I—"

"I'm glad to know that the experience wasn't unpleasant," broke in Nancy, her eyes dancing. "Do I get out here?" (as Matt, his face the color of a peony, stopped the engine).

Long Bicycle Trip

Pedals Machine From Nova Scotia To Vancouver

A 20-year-old jobless farmhand from Nova Scotia has a bit of advice to pass on to ambitious young Canadians who are unemployed and desire to keep up their morale and good health.

His advice is: do something.

Two months ago Hubert Smith of Amherst, N.S., packed a few belongings including some blankets and a tent, packed them on his bicycle and started out.

Recently he arrived in Vancouver, ruddy-faced, happy and in the best of health after cycling 3,750 miles over Canadian highways with his 60-pound load.

A Favorite Instrument

Malayans Like Bagpipes And Have Learned To Play Them

The Malayans like the bagpipes, and they play them as well. It is only 18 months since the instruments were introduced to them, but already the Johore military forces have given their first public performance—and it was a great success. It was at a military tattoo arranged as a farewell to the Sultan, a Scotswoman who hails from Edinburgh, and is commander-in-chief of the forces, before her departure for Europe.

THE RHYMING OPTIMIST

By Aline Michaelis

FORSAKEN CRESTS

Upon a hill, no matter where A hill abrupt and bold, rock-strown, Four walls, unfinished, cleave the air And fall in light of sun and moon.

They crumble in the wind and rain; All unpreserved, slow year by year, They mingle with the earth again; Their outline grows less sharp, less clear.

I wonder if the builder's thought Does not, in longing, sometimes wing Back to the hope which came to naught,

This poor, eroded, ruined thing?

Once I built so; dear God, I yearn For vistas cloud-brushed, sun-sweet, vast— Who knows? Perhaps I shall return To those forsaken crests at last!

Talking About House-Flies

—Do You Know This?

Doctors and Scientists Realize Danger To Human Life Caused By This Pest

A common housefly has four black stripes on its back. It has large eyes, short feelers and one pair of wings. It has two small, round balancers borne on slender stalks, which also act as organs of hearing. Its body is covered with a fine mesh of hairs. It has a hard, compact body, like a grain of sugar, with saliva from its own glands before it can suck it.

It has a large amount of fat and waste and carries disease germs on its hairy legs. It lays one hundred to two hundred eggs in one batch which hatch into maggots in twenty-four hours and often before the pupae come to the pupa stage. This refers to the life between stage after they are maggots and before they are adult flies.

It is an extremely dangerous pest, especially to children. It breeds in the filth and waste of houses, and it is the cause of many diseases. It is a carrier of typhoid fever, cholera, dysentery, and other diseases.

It breeds in the filth and waste of houses, and it is the cause of many diseases. It is a carrier of typhoid fever, cholera, dysentery, and other diseases.

Blairmore, Alta., Thur., July 25, 1935

300 CANDIDATES ASKED TO
DECLARE THEIR POLICIES
ON ROADS, TOURIST TRADE

When the 200 or more candidates in the forthcoming Alberta election go before the people, they will be called upon to answer some pertinent questions concerning their policies as to highway development and increasing of tourist traffic.

A vigorous campaign is being waged by the Alberta Motor Association, with a view to bringing this question to a head at this election. This campaign will be carried on in all parts of the province.

In every district members of the A.M.A. and their friends are being urged to put clear questions before the candidates, so that those who are prepared to state their policies may do so at this time.

This is a vital election in the history of Alberta. This also is a vital period in the history of the highway development and tourist industry of this province. That makes it all the more necessary that those who seek to occupy the seat of government should make their policies known.

More permanent highways are the crying need of Alberta. In their wake will follow the productive tourist trade that gives such a necessary impetus to business. As it is now, many tourists, eager to reach the beauty spots of this attractive province, now find their way barred by highways over which traffic cannot pass at times, or roads that are far from being smooth.

The Motor Association is emphasizing the fact that good roads bring in lucrative tourist trade, all of which puts more dollars in the farmers' pockets. It is a cash business, far more profitable than wheat growing, stock raising or any of the other primary activities of this country.

In view of these facts, the Motor Association is asking the candidates to "lay their cards on the table" on this question. It feels that this is no time for pussyfooting. Either a candidate believes in permanent highways and the building up of a profitable tourist trade in a country whose scenic beauty is one of its chief assets, or he does not. There can be no side-stepping the issue.

In a campaign that is bound to be clouded to some extent with conflicting issues, it would be a refreshing feature to have members elected who were pledged without regard to party affiliations to a highway and tourist development policy.

Let those who are living in various towns, villages and rural areas take advantage of this opportunity to get a definite promise from the candidates that they will back a New Deal for the motorists and tourists of this province. When members are pledged to this policy before election and will run with that as one of their planks, action will be taken in the legislature.

For at least a couple of years, the town of Blairmore appears to have been running without a definite plan. Instances galore have been recorded where the work of yesterday was literally undone today. About the only other silly thing that we could suggest to be done would be to move the Frank Slide to Blairmore next week and just as promptly return it another week hence. And for all this nonsense take it out of the people who have vested interests here and give it to those whose only interest in the town of Blairmore is what they have invested to a probably better purpose in some foreign land.

SOCIAL CREDIT CANDIDATES

William Aberhart, leader of the Social Credit party, announced his candidates on Monday night. For Southern Alberta they are as follows:

Lethbridge—Hans Wight, electrical engineer.

Cardston—Eldon Tanner, teacher, Cardston.

Cypress—A. Flammé, farmer, Bow Island.

Little Bow—Rev. Peter Dawson, Champion.

MacLeod—James Hartley, butcher, MacLeod.

Medicine Hat—J. L. Robinson, chiropractor, Medicine Hat.

Nanton-Claresholm—H. O. Haslam, K.C., lawyer, Claresholm.

Okotoks-High River—Rev. William Morrison, Blackie.

Pincher Creek—Rev. Roy Taylor, Coleman.

Rocky Mountain—E. A. Duke, teacher, Canmore.

Tabor—James Hansen, farmer and mayor of Tabor.

Warner—Solon Low, teacher, Stirling.

For the province, Mr. Aberhart has named 63 candidates in fifty-three ridings to contest all seats in the legislature.

CANADA WORLD'S
GREATEST PRODUCER

Toronto, Ont.—Canada has emerged within the last few months as the world's leading producer of platinum, following a remarkable and steady increase in the Dominion's output of this precious metal till, in 1934, the world consumption and Canadian production were almost exactly the same.

Figures on Canadian production were discussed here today by John C. Nicholls, assistant to the president of the International Nickel Company of Canada.

"We believe from a comparison of all the world production figures available, that Canada is now definitely in first place," Mr. Nicholls said.

"Hitherto, Russia, with mines in the Ural mountains, has been the chief source of platinum. Reliable figures on Russian production last year cannot be secured, but a study of all data on production and consumption which is to be secured indicates that Canada has definitely taken the lead."

In 1934, Mr. Nicholls said, Canada produced slightly over 200,000 ounces of the metals of the platinum group. He thought that 1935 production would also be high.

"Platinum is a by-product of nickel production," he explained. "There is approximately one ounce Troy of platinum in each 20 tons of copper-nickel ore from the Frood mine and the efficiency of modern milling and refining methods now makes practical the collection of the minute particles of platinum present in each ton of platinum-bearing ore."

Though platinum has been found in seven of the nine provinces and was observed as long ago as 1862, there are no official statistics on production before 1920, and during the next 12 years the total for the platinum group was only 419,000 ounces, or slightly more than double the production during the last 12 months. For 1933, it was 55,755 ounces but the remarkable increase in copper nickel ore mined in the Sudbury basin brought the total over 200,000 ounces for last year.

"Canada is now producing on a commercial scale, five of the six precious metals in the platinum group," Mr. Nicholls says. "These are platinum, palladium, iridium, rhodium and ruthenium. All are found in the nickel-copper ores of the Sudbury basin; and Canada is also the world's chief source of palladium. Osmium is the remaining metal not produced in this country."

"In addition to its use in jewelry and as a setting for gems and precious stones, platinum is widely used in industry. It also acts as a variety of chemical ringmaster, causing other

BLAIRMORE UNITED CHURCH

Rev. Albert E. Larke, Minister

"Serve the Church that the Church May Serve You."

Services Sunday, July 28th, the minister in charge.

10 a.m.—JUNIOR SCHOOL.

11 a.m.—PUBLIC WORSHIP.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday, July 28th:

Evening service at 7:30 o'clock.

The Sunday school will be closed for the summer months.

THE SALVATION ARMY

Coleman, Alberta

Lieutenants Fitch and Pierce

Have you attended any services at the Salvation Army? We would be happy to see you at any of the following meetings:

7 p.m. Friday—Special meeting for Young People.

3 p.m. Sunday—Sunday school for all young people.

7 p.m. Sunday—Bright Salvation meeting, The Sunday "Foundry's Night."

Friends of Blairmore are especially invited to attend our services at Coleman. God bless you.

elements to react while being unaffected itself."

C. N. P. FOOTBALL DRAWS

Following are the results of the draw made at Coal Creek on Sunday for the Crows' Nest Pass Football League challenge games:

Grand Central Cup—First round,

Michel versus Coal Creek; byes, Colemen, Fernie, Blairmore. Second round, Coleman versus Michel or Coal Creek; Fernie versus Blairmore.

Crusher Cup—First round, Coal Creek versus Michel; second round, Coleman versus Michel or Coal Creek; Blairmore versus Fernie.

Mutz Cup—First round, Fernie versus Coleman. Second round, Blairmore versus Coal Creek; Michel versus Fernie or Coleman.

Games to be played on the grounds of the first named club.

A Blakie, of Fernie, is secretary of the Crows' Nest Pass League.

WINNERS IN HAMILTON
LIGHT INFANTRY DRAW

In the Royal Hamilton Light Infantry draw, held at Hamilton, Ontario, recently, cars were won by L. Ferguson, McDonald's Corner, Ontario; H. S. Yamada, Vancouver (ticket sold by himself); Jack Woods, Hamilton. Alberta winners included: R. Ukindi, Leduc; W. Yee, Calgary, radios; S. D. Fletcher, Calgary; W. T. Bidde, Coronation; Robe Candie, Edmonton; W. Montgomery, Edmonton; Mrs. R. Matthews, Lethbridge; Evelyn Burns, Calgary; Roy Whaley, Ludale; A. Baumgart, Edmonton; J. McDonald, Aldersyde; F. N. Fahrner, Chauvin; W. L. Feder, Jenner; L. Herman, Lethbridge; H. L. Mahon, Edison; F. J. Durling, Edmonton; C. C. Harris, Lethbridge; Mary Lysak, Parkland; G. Raamsdell, Edmonton; C. T. Watson, Hartle; A. Wilson, Duhamel; I. Czulek, Bickerdale; L. M. Paddison, Lacombe; W. Breedon, Calgary; O. Strain, Calgary; Al. Funk, Edmonton; Arvid Smith, Neelak; Lay Kelly, Viking; Jerome Froman, Ponoka; S. Paulson, Islay; W. J. Robinson, Vermillion; J. E. Johnson, Mirror Landing; P. G. Johnson, Mirror Landing; R. Olson, Mirror Landing; M. Eastabrook, Calgary; Phillip Lee, Edmonton; Douglas Seaman, Edmonton; K. A. Murray, Edmonton; George Heatley, Warner; W. H. Johnson, Calgary; Tote Hauley, Fort Macleod; F. Beaumont, Calgary; H. Blas, Calgary; F. Withey, Calgary; H. A. Wilson, Rockyford; Wilfred Cook, Lethbridge; Wilfred Johnson, Bashaw; A. R. Stacey, Luscar; H. R. Ballam, Crossfield; F. Deering, Cainford; J. Reid, Edmonton; M. Fisher, Calgary; Mrs. E. Witing, Two Rivers; N. McCallum, Calgary; H. F. McKee, Edmonton; Julia Shurah, Edmonton; Mrs. A. Stewart, Calgary; J. E. Johnson, Mirror Landing; J. Reid, Edmonton; Wm. Giroux, Grand Prairie; M. S. Tracy, Edmonton; Rose Young, Didsbury; A. Murar, Aerial; Rika Van Lofsen, Monarch; J. W. Sheldon, Calgary; Dominion of Canada Rifle Association memberships.

THE SMALLEST NEWSPAPER

The world's smallest daily newspaper is published on Thursday Island, which lies between the far north of Australia and New Guinea. It is called the "Torres Straits Daily Pilot." It is a single sheet, 12 by 9 inches, printed (not typewritten) on the one side, but it keeps the inhabitants of this tiny speck of Empire abreast of world doing till the ocean-going steamers (with gaps of weeks) bring city papers to the island. The subscription rate is one shilling a week, but to non-subscribers the cost is 1s. 6d. a copy. The Pilot consists of three columns. One is devoted to shipping news, another to Australian

FIRE
WARNING

Attention is drawn to the PROCLAMATION dated the 28th day of August, 1930.

OPEN FIRES PROHIBITED

The proclamation prohibits the kindling of fires for camping and other use of fire outdoors between First Day of August and First Day of December of each year, save by the use of satisfactory stoves.

RESTRICTED AREA

IN ALL THAT TERRITORY bounded on the north by the Bow River, on the south by the International Boundary, on the East by the West limit of the right-of-way of the Calgary and Edmonton Railway from its intersection with the Bow River in Township 24, Range 1, West of the Fifth Meridian, to its intersection with the east boundary of Township 9, Range 26, West of the Fourth Meridian, thence south along the said boundary of Range 26, West of the Fourth Meridian, to its intersection with the International Boundary, and on the West by the boundary of Alberta and British Columbia.

Any person failing to comply with the provisions of this proclamation shall be subject to a penalty of a fine not to exceed \$200.00 and costs in addition to any civil liability which may transpire.

DEPARTMENT OF LANDS AND MINES

J. HARVEY, Deputy Minister

ALBERTA'S BID FOR TOURISTS

Most westerly of Canada's prairie provinces, Alberta has entered upon a new era in tourist traffic with the establishment of a new highway system. This road system of more than 2,000 miles, linking up as it does all the main mountain resorts with the chief cities and towns, and the more attractive rural holiday spots, makes Alberta's vacation grounds an open book to the motor tourist from any part of the continent. In Alberta mountain and prairie meet, and the tourist is afforded an opportunity to blend the delightful prairie scenery with the striking grandeur of the Rockies. The ridge of the Rocky Mountains running northwest from Glacier Park in Montana is the boundary line which separates the southern parts of the provinces of Alberta and British Columbia. The eastern slope of the Rockies furnishes the watershed from which spring the rivers that water the whole of the western Canadian prairies. This watershed is protected by a vast forest reserve, running almost the entire length of the mountain area of Alberta; and here is found the hunter's paradise, big game a-plenty; while in the mountain streams and lakes there is great sport for the fishing enthusiast. More than 8,000 square miles have been set aside as national parks in the Alberta Rockies. —National Revenue Review.

HILLCREST HAPPENINGS

W. Hutchison is visiting in Vancouver.

A miscellaneous bridal shower was held in honor of Miss Angelina D'Amico in the gymnasium on Tuesday evening. Cards were played during the first part of the evening; then a dainty luncheon was served. Miss D'Amico was presented with many beautiful gifts, for which she thanked her friends in a short speech.

Mr. and Mrs. Walter Rose, junior, of Saskatchewan, are guests of Mr. and Mrs. W. Rose.

Miss Jean Cruickshank accompanied Mr. and Mrs. A. P. Hughes to Regina, where she will stay for a few weeks.

In a baseball game here on Monday, Hillcrest defeated Coleman semi-7-5.

C. Rhodes, of Champion, was a visitor here on Monday.

Mr. and Mrs. R. Clarke and family left by motor Saturday for Vancouver.

Miss Doris Bamforth is the guest of Mrs. A. Blackie in Fernie.

Mr. and Mrs. W. H. Moser and family are holidaying at Waterton Lakes.

Miss Gladys Neilson, of Coleman, and Mr. Harry Douglas were united in marriage at Lethbridge on Monday afternoon. After a short honeymoon, the young couple will take up residence in Hillcrest.

JOHN MCIVOR IS LAID TO REST

Macleod, July 19.—The private funeral of John McIvor, who died on Tuesday, July 16, was held from his home on Thursday afternoon, only relatives and intimate friends being present. The Rev. Alex. J. Mitchell, of Trinity United church, conducted the service.

The deceased was born at Embro, Huron County, Ontario, on April 14, 1851, thus reaching the long age of 84 years. As a young man he settled at Albermarle, north of Warion, and later was appointed as postmaster at what was known as the McIvor post office, named after the deceased. He was married at Albermarle in 1876 to Miss Christina Robinson, who survives him. He is also survived by two sons, and four daughters. J. T. McIvor, conductor on the C.P.R. out of Macleod; Ivor McIvor, a barber at Airdrie, Alberta. One son was killed while on duty in the C.P.R. yards at Winnipeg. Mrs. A. J. Duncan, Warion, Ont.; Mrs. W. G. Holler, Maymont, Sask.; Mrs. S. F. Pruder, Purple Valley, Ont.; J. T. McIvor, Mrs. Holler and Mrs. Couch were present at the time of his death.

Mr. McIvor has been a well known and esteemed resident of Macleod since 1914, when the family came to the West. He took quite an interest in local affairs, and was a regular attendant at Trinity church, taking an active interest in the work of the church.

George: "Yes, the bullet struck my head, went careening into space, and . . ."

Friend: "How terrible! Did they get it out?"

BEAUTIFUL MONUMENTS of cedar, from \$10 to \$25, carved in granite. Fred. E. Palmer, Woodcarver, Main Street, 16580, 75th St., Edmonton, Alberta. Agent wanted.

RUMSETT — DYER

A quiet wedding was solemnized at 10:30 Monday morning in St. Barnabas church, Medicine Hat, when Miss Elizabeth Jane Dyer, third daughter of Mr. and Mrs. Cecil Dyer, of Burmis, Alta., became the bride of Mr. Clinton Francis Rumsey, of Beaver Mines, Alta., only son of Mrs. J. J. Weaver, of Medicine Hat, Rev. J. F. Butcher officiating.

The bride entered the church on the arm of Sgt. J. J. Weaver, R.C.M.P., to the strains of the wedding march, Mr. Bob Thompson being the organist. She wore a long white crepe dress with a picture hat to match and carried a mixed bouquet of roses, carnations and fuchsias, tied with white tulle ribbon. The bridesmaid, Miss Mary Nixon, had chosen a yellow organdy dress with a yellow hat, and carried mauve sweet peas. The groom was supported by Mr. John Dyer, of Burmis, brother of the bride.

Following the service, the wedding breakfast was served at the home of Sgt. and Mrs. Weaver, the latter receiving the guests in pink ensemble with a white hat and accessories. During the afternoon, quite a number of friends called to wish the newly married couple much happiness in their future life.

The bride chose for travelling a brown ensemble with accessories to match.—Lethbridge Herald.

The little sundew plant of Newfoundland eats insects. When one alights on the little red hairs which cover the flower of the plant, it is caught by a sticky fluid. The hairs roll inward and drop the insect into the centre of the flower, where it soon dies and is digested.

Magistrate P. C. H. Primrose, who sat in Edmonton police court since 1913, and who gained wide reputation for his direct denunciations of criminals and prompt sentences when he convicted them, is retiring on July 31st, to be succeeded by A. H. Gibson, K.C., of Fort Saskatchewan.

Writs for the provincial election, Thursday, August 22nd, were issued at Edmonton on Monday by John D. Hunt, K.C., chief electoral officer. H. Crawford, former M.L.A., is named as returning officer for Edmonton, William Pegge for Calgary, and C. Edward Cameron for Lethbridge.

In the mine rescue contests at Fernie on Saturday, held under the auspices of the East Kootenay Mine Safety Association, Coal Creek won first honors, with Fernie second and Michel third. In the confined senior event of the First Aid section, Fernie first, Kimberley second, Michel third.

Elmer G. Evans, principal of the Didsbury school, has been appointed to succeed Arthur Wade as principal of the school at Macleod. Mr. Evans is a brother of E. W. (Doc) Evans, who is now on the teaching staff at Pincher Creek. Thirty applications were received for the Macleod position.

Since Mr. Aberhart has announced that "we could issue dividends from the end of a fountain pen," every person is making sure that their pens do not leak.—Nanton News. Well, anyhow, perhaps the opposite end of that pen would have to be backed by sufficient wealth to meet that so-called dividend.

A. P. Hughes and daughter, of Regina, were guests for a few days last week of Mr. and Mrs. G. E. Cruickshank at Hillcrest, and incidentally visited a number of old friends in Blairmore, Frank and Coleman. Mr. Hughes was an employee of the Union Bank at Frank up to about 1912, when he assumed the sub-managership of the bank's branch at Passburg. He is now in the fire and life insurance business in the Saskatchewan capital.

This is Ted Royle, smiling at one of Aberhart's promises.

Local and General Items

And here's another thing: It may really seem longer, but some statistician has figured it out that the average housewife, on reaching her three score and ten, has spent two years of her life in just washing dishes.

An old-timer visiting Blairmore on Friday last, when asked how he liked our town now, replied: "Your town would be alright if you could only get rid of that d—n Red element and such nonsense as that so-called Tim Buck boulevard."

Thirty years ago, Mark Drummond and Charles E. Sutherland, who had been publishing a newspaper at Frank, dissolved partnership, Mr. Drummond assuming full control. That same year, George Hogarth sold his hotel at Elko to Albert Mutz.

The 79,000-ton French liner Normandie will be laid up for four months next winter to have alterations made. Vibration on her recent trip was so great that it has been found necessary to fit her with new propellers.

D. R. McIvor, of Stettler; A. R. McIvor, of Calgary, and George Holter, of Fielding, Sask., were visitors to Blairmore last week end, after attending the funeral of John McIvor, a brother of the former two, at Macleod. Mr. Holter is a son-in-law of the late Mr. McIvor.

Mr. and Mrs. McElvin, of Port Arthur, Ontario, stopped over in Blairmore on Saturday night, enroute back from the Pacific coast. They stated that for the entire trip Port Arthur to Vancouver and back, the roughest piece of road they were obliged to travel over was through Blairmore.

Rev. A. E. Larke will not be taking his holidays in August but will remain in Blairmore and will be in

charge of the services at Central United church. The hour of the services will be at 11 a.m. instead of at 7:30 p.m. as had been previously announced.

As a result of a debate staged at Lealerville, "Communism versus Social Credit," with George Palmer supporting Communism and C. H. Harris, Social Credit, the judge decided that there were thirty-four out to Sunday school and forty-five to church on Sunday last.

There is a prospect of the Nova Scotia schooner Blueose, queen of the West Atlantic fishing fleets, being sold to an English yachtsman, according to a statement credited to Capt. Walters. The Blueose is now in English waters, having been present for the Jubilee.

On Friday evening next, July 26th, the vacation school which has been held during the past two weeks in Central United church will come to a close with a concert and demonstration at 7:30 o'clock. Parents and friends are extended a cordial invitation to attend. It is being put on for you. A collection will be taken to assist in defraying the expenses of the school.

Coleman water and light consumers are looking forward to another slight reduction in rates. Last year a reduction was made on light from 12 cents to 8 cents for the first 25 kilowatts and 7 cents over the first 25 k.w. Now it is hoped a further cut will be made of one cent per kilowatt hour on domestic lighting and 20 per cent on water rates. In addition, the rate of one dollar will likely be dropped.

The West Canadian Collieries band, under the leadership of George W. Goodwin and made up of Blairmore and Bellevue musicians, is making good progress, practicing alternately in the two towns. It is more than likely their next engagement will be at the Flower Show at Bellevue on Labor Day.

A bunch of young ladies from Blairmore bathed in a pool near Sentinel at the closing hour of the day on Monday. Tuesday morning the water in the Old Man River at Blairmore was so dirty that you couldn't see through five inches of it and the poor fish decided to rest for a day.

A determined effort was made the early part of the week to improve the condition on Victoria Street along those blocks made rough and almost impassable by water from the hothouse spray system. This latter system has been much improved by the installation of a finer spray with wider range.

The King's Time prevails in London, according to the Canadian National Railways Magazine which in its July issue describes the formalities which are undergone daily when the Irish Mail carries the King's Time to Holyhead. Each day a special messenger brings a watch from Holyhead to London. The watch is carried to the Post Office, wound and handed back to the Overseer who carries it to Euston station, where it is placed on the night mail to carry the official time back to Holyhead. An Admiralty messenger has been performing this function daily since 1837.

One hundred years ago the first steam whistle was applied to a locomotive. It displaced the steam trumpet which was in use on the Leicester-Swannington railway. Earlier still the locomotive driver had to use pangs of anguish consequent upon

The Country Weekly Newspaper

"What do you think of the future of country newspapers?" This question was asked Mr. Wright A. Patterson by a teacher of journalism in one of the western United States state universities in the course of a conversation in which the successful efforts of big city dailies and periodicals to increase circulation in rural sections was noted, and the editorial content of these publications discussed. In answer, Mr. Patterson painted a picture of the future as he sees it.

Acknowledging that there is a place for the small weekly newspaper—and, and probably nowhere more decidedly so than on the prairies of Western Canada—the important question is: How is that position to be maintained, improved, developed; and are our Western Canadian editors alive to the situation and endeavoring to meet it? If they are, they will undoubtedly receive the public support they will so well deserve.

Both weekly newspaper publishers and the reading public will be interested in Mr. Patterson's word-picture as it is presented in a recent issue of The Publishers' Auxiliary. While a bit too lengthy for complete reproduction in this column, excepts may be given:

"There has been, within the last quarter of a century, a radical change in the people of the rural communities—the people of the towns and on the farms. Up to a quarter of a century ago, these communities were self-centred. The people seldom got beyond their local market place. It was a day's task for the farmer and his family to get as far away from home as the nearest town, possibly not more than three or four miles away. The only form of conveyance was the farm wagon, or the horse and buggy. The roads were narrow stretches of dirt that were, during portions of the year practically impassable. From one year to another the vast majority of the rural people—the people of the towns and farms—did not get beyond their municipal lines. It was the exceptional rural family whose children went away to school. The students at universities were largely from the cities, and the number attending universities was small as compared to the present time.

"Under such conditions the horizon of the rural family was extremely limited. Its members had practically no contact with the outside world and quite naturally the interests of these rural people centred about themselves and their neighbors.

"The country newspaper that catered to that local interest, that recorded the events in which the people of each community played a part, was satisfactory to the people of these communities. To this local news coverage, many editors added some general news and entertainment material and made for that time a satisfying newspaper that met very much reader demand."

"Today conditions are radically different. The automobile and good roads have made travel possible. The day's trip now is to the city, anywhere from 50 to 300 miles distant from the rural home. The World War took tens of thousands of the boys of the farm into distant training camps and associated them with boys from every section of the nation, and with every class. It sent them across the ocean into far distant lands. It widened their horizons to include practically the entire world and all classes of people and all forms of activities. It gave them a new outlook and new interests. That was 18 and 20 years ago. The farm and town boys of the World War days are now the men, the heads of families, of the rural communities.

"The radio has brought the world to the rural community fireside. It has widened the view of the people of these communities until it includes all Canada, the United States, England, France, Japan, Australia and every known point in the world.

"Go to the universities to-day and a large percentage of the students are from the towns and the farms. These young people are acquiring for themselves and taking back to the rural homes from which they come, an increased interest in national and world affairs, in history in the making, in the arts and sciences and in literature.

"As a class the rural audience of to-day is a more intelligent audience than that of the city. The people of the towns and farms have to-day a wider interest than the average individual of the city. They are in no sense provincial.

"It is such an audience the country newspaper of to-day and to-morrow must appeal to if it is to live. It must bring to them intelligent interpretations of what is happening throughout the world because it is to-day their world, and they know that its happenings may directly concern themselves. The cotton farmers of the Southern States know that happenings in far-away Japan may make or break the price they get for their cotton. They know that should war come between Italy and Ethiopia, it might affect the regulation of the waters of the Blue Nile and so affect the cotton crop of the Egyptian Sudan and create a larger demand and higher price for American cotton—their cotton. The wheat farmers of Western Canada know that drought in Russia, in Argentina, in Australia, in France or many other sections of the world would certainly raise the price they would get for their product.

"The people of the towns and farms insist upon keeping in touch with those national and world affairs that have a direct bearing on their lives. They expect the newspaper they buy to bring to them interpretations of such happenings. They do not want rumors and surmises, but they do want statements of fact and what such facts mean. They will buy the newspaper that gives them such information."

"Weekly newspaper editors are awakening to these new conditions. They are realizing that it is quality not quantity of reading matter that is demanded, and that the demand can be met in the limited space of eight to 10 or 12-page papers, giving them room to cover the community happenings and with that interpretations of events in the nation and the world, and a reasonable amount of entertainment."

"For the paper that does these things there is a future. Such a paper will cover all of the 18-odd national and world interests of its readers and will make itself so much the newspaper needs as to leave no necessary place for a paper from the outside. For such a paper there is a future, greater than that of the past, and the majority of the editors of country newspapers are awake to these things. The small minority that are not, or do not awaken will, in time, pass out of the picture."

Forgetful Time Of

L. F. Loree, president D. & H. Railway says: "When you look over the people who get to the top you'll still find that they're the people who followed the old fashioned way of working like the Dickens until they got where they wanted to get, people who forgot about time off."

One Explanation

Some surprise is expressed by an American sports journal at the return of the bicycle to popularity. It may be due to the fact says the Winnipeg Tribune that so many people desire to combine a sense of safety with the thrill of rounding a curve on two wheels.

Reclamation Work

Applications From Farmers Keep Pouring In, And Work Progresses

Hon. Robert Weir, minister of agriculture, received a report from Dr. E. S. Archibald, director of experimental farms and chairman of the advisory committee which has the reclamation work in hand. The report indicated active co-operation from the western farmers to the undertaking.

Up to date 69 townships in dry-frequent areas have joined in the community effort by which each farmer agrees to follow advice of the departmental experts in cropping their land, sowing grasses and in other ways co-operate to protect the communities from soil drifting and other drouth ills.

Applications for engineering and other assistance in the construction of water conservations are being received. This assistance is asked for in the construction of dug-outs, small stock-watering dams, small irrigation dams for farm and ranch for acre crop production, flood schemes and pumping schemes. "They are pouring into the department at the rate of 60 to 100 a day," the report stated.

"On July 5, there were 102 applications from groups of farmers asking for assistance in dugouts and small watering dams, averaging 25 farms per application." There were more than 700 other applications from individual farmers.

"Over 70 applications have been received and a certain amount of engineer investigating, already done on many of these for the construction of community dams for domestic use, land irrigations, or animal in transit water supply," the report said.

"Amongst those which have already been found feasible by the engineering staff are Wild Horse project, White Mud project, Souris dam, Crystal City dam and others.

"An engineering staff consisting of one senior engineer, nine engineers, and one junior engineer has reported for duty and thanks to the co-operation of the Dominion hydroelectric service, which has supplied necessary instruments are busily engaged in field engineering work. Reports with recommendations are coming in from these engineers rapidly."

New Form Of Flight

Man In Florida Has Used Wings With Success

The idea of strapping "wings" on a man was elaborated in some detail by Leonardo da Vinci. At the Science Museum in South Kensington there is the original "Ornithopter" designed by Frost in 1902. It is a beautiful work but never flew. It seems now that a new form of flight has been made practicable by Clem Sohn, known as the "human bat" who only recently flew over Daytona Beach, Florida, with "wings" of his design attached to his arms and "webbed feet". The earliest dreamer who sighted for wings of a dove could have done the same if only they had had some means of alighting safely. The practitioner has made bird-like flight possible. Once again he has thrown himself from an airplane at a suitable height but has only to fall 1,000 feet to gather a speed of 100 to 150 m.p.m. At this speed he can glide from bank, turn or execute any manoeuvre.

Old Game Revived

Chinese Again Playing Polo After Lapse Of 300 Years

For the first time in three centuries two Chinese teams recently galloped about a polo field. The historic occasion was part of the athletic meeting of General Shang Chen's 2nd National army held at the temple of agriculture in Peiping.

Although the Chinese were playing polo 1,000 years ago, the game was

allowed to lapse and was not revived until inspiration was furnished by

Li Henry S. Jiljian, young Kon-

querian and West Point graduate of Uncle Sam's cavalry. He is stationed at Peking for the study of the Chinese language.

Delegates Entertained

At the annual convention of the Saskatchewan Rural Municipal Sec-

retary-treasurers, the delegates and

wives were entertained at a theatre

party given by the Central Press

Limited, Regina, and greatly enjoyed the picture "Caliente" shown at

the Capitol theatre.

Pretty Wife (on stand in divorce court): "It was the old story, a horse and a jockey can never agree."

Husband (roaring, as he shook off the restraining hand of his attorney): "See here, don't you call me a horse?"

2108

Donaldson Atlantic Line

Change Of Name Is Announced By Agents

Donaldson Atlantic Line is the new name for the former Anchor-Donaldson Line, it was announced by Cunard White Star Limited, who are their agents in Canada and the United States.

"The change of name signifies the return of the Canadian-Scottish passenger service to complete control by the Donaldson interests which originally promoted it," stated George D. Hubard, deputy chief Canadian representative of Cunard White Star, in an interview at Montreal.

"The Donaldson Line itself commenced its Canadian operations in 1870 and has since then maintained continuously its Canadian operations in service between Canada and its home port of Glasgow. Its growth has also been marked by the acquisition of the Allan Line service to South America, the development of the Montreal-Bristol Channel trade and the service from Vancouver to Great Britain."

Empire Trade Agreements

New Deal With Canada Desired By Australian Premier

A new trade agreement with Can-

ada embodying additional features is desired by Australia, Prime Minister Joseph Lyons of that dominion said in his conference with Prime Minister R. B. Bennett.

The Empire Trade agreements negotiated in 1932 had proved satisfactory and had brought about an increase in trade. Australia was anxious to achieve further increases and believed a revision of the present treaty in the light of experience would accomplish this. While it was true Canadian exports to Australia had increased more rapidly than Australian exports to Canada, Australia had no grievance and did not consider it had got the worst of the bargain.

Happy Landings

Thrilling Episode Enacted At Moseley Airfield

A jumper whose parachute was torn away in midair was saved by a fellow parachutist in a thrilling episode at the Moscow military airfield.

Soldier Noskoff caught on the stabilizer of an airplane after leaping from the wing, lost his chute and hurtled down. In midair he struck another parachutist, Soldier Kraskoff, and clutched him desperately.

They fell rapidly, until 300 feet above the earth Noskoff found the cord of Kraskoff's reserve chute and opened it in time to check their fall. Both landed safely.

Vimy Pilgrimage

Dominion Organizes Leaves For Europe To Complete Plans

Ben W. Allen, Dominion Organizer of the Vimy Pilgrimage which is being planned by the Canadian Legion of the British Empire Service Men's Association, and the Canadian Star Line Alauda, to complete arrangements for the reception and billeting of Canada's Peace Army which, at this time next year will be returning from Europe after the Battles of France and Belgium.

"While the climax of the Pilgrimage will undoubtedly be the Unveiling of the great Memorial on the Ridge of the Menin Road, the itinerary will include visits to the Battlefields and cemeteries in the Amiens, Arras and Ypres sectors, where the Canadian Corps fought its greatest battles and where Canadian soldiers made their greatest contribution towards victory and peace."

On the continent, Mr. Allen will confer with the French and Belgian governments and other European organizations regarding the official part of the program and will complete the arrangements for the route to be followed and the transport to be used. "We have already had indications," Mr. Allen said, "that our old allies propose to make our visit next year the occasion for a joyful re-enactment of the celebrated international friendship. It will be a tremendous experience for the 'troops' and their families."

In London, Mr. Allen will confer with the British Empire Service League, the Canadian High Commission

and the Canadian War Graves Commis-

sion, and the Canadian Pacific and Cunard-White Star Steamship Lines.

Throughout the tour, Mr. Allen will be accompanied by Mr. J. R. Boyce, M.P.E., General Secretary of the Canadian Legion, Dominion Com-

OGDEN'S FINE CUT

PHRENOLOGY

Use Your Head!

Times are better . . . why not get back to Ogden? You no longer need deny yourself the best cigarette tobacco when it costs so little!

Get yourself a package of Ogden's Fine Cut . . . smoke it with "Vogue" or "Chantecler" paper . . . and you'll say: "Happy bargeons, here again."

Fifty-two Pouch Hands, any numbers, now accepted as a complete set.

Air Routes Are Valuable

Make Communication With All Parts Of Empire Possible

Air and Empire are closely linked. The most valuable bonds in any empire are its communications. The Romans knew that. Their roads were veins for their empire's life-blood. But the speed of modern transport has made communications ten times more valuable. If Britons and Americans could have used airplanes to exchange their views in 1775 America might never have left the Empire. The more air routes we open to keep the Empire together the fewer problems will arise to keep it apart.—London Sunday Express.

New Gyroplane Tried Out

Will Rise Vertically And Attain Ordinary Horizontal Speeds

A newly perfected gyroplane, an aerial craft capable of rising vertically like a helicopter and attaining horizontal speeds comparable to those of ordinary aeroplanes, went through an initial trying out at Villeneuve, France.

Its propellers are placed in horizontal positions, powered by several motors.

The best way to get your name in print is to catch a trout weighing about five pounds.

Insects cannot smile, because their muscles are inside their skeletons.

TIRED and IRRITABLE

Do you feel weak and nervous? Is your housework a burden? Try Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. K. e. of Woodstock, New Brunswick, says: "I was weak and rundown. A neighbor bought Lydia E. Pinkham's Vegetable Compound. It helped me so much that I am taking it now at the same time."

Cat's eyes! Now! It may be just the medicine YOU need.

Try Lydia E. Pinkham's
VEGETABLE COMPOUND

SAYS PUBLIC IS LOSING INTEREST IN AGITATORS

Victoria — Praise for the level-headed action of the provincial police in the Corbin riots this year, and some plain speaking from the bench featured in a judgment handed down at Fernie recently by Judge G. H. Thompson, who sustained conviction of three men sentenced for making trouble at the scene, and who expressed a warning to others that the public was out of patience with agitators in Canada.

A copy of the judgment was received by the attorney-general's department. It read, in part, as follows:

"Three months ago," his honours told the accused, "the papers were full of your actions. The Corbin riots appeared in the newspapers with headlines in red. I was interested in reading this morning to see that you occupy about an inch of space in the newspapers. The people have lost their interest in you; you amount to so little in the eyes of the public that the newspapers hardly mention you."

"On the other hand, what is occupying the attention of the people today? What has occupied the thoughts of the people for the last 100 years and will occupy them for untold generations to come? Canada! And so you thought you could fight Canada. Canada has no room for men like you. What is more, Canada has no time for men like you. Canada is working out its own problems. It is too busy working out its own destiny to be bothered with men like you."

"You are too small to fight a nation. I hope that one thought will be a lesson to you three men and to the rest of the community. We are none of us big enough to fight our nation. No section, whether it be an aggregation of wealth or an aggregation of violence, can fight the country."

"I wonder, too, if you ever thought whom you were fighting in the concrete? The men whom you were fighting were men just like yourselves, just as human as yourselves; earning their daily bread, doing their duty. You sent several of them to the hospital. You have malmed some of them. Do you think it is fair? They are better, no worse, than you men. They risk their lives for a small wage. You are risking your lives in the mines. We all have to work. There is no room in Canada for the man who does not work."

Interested In Farming

Prince Of Wales Says Agriculture Makes A Special Appeal

London — The Prince of Wales delivered an address formally closing the conference on scientific organization of agriculture and industry.

"Being personally interested in farming both in this country and Canada, the agricultural section of the exposition makes a special appeal to me," he said, "in what concerns the development of modern farming techniques and equipment is of the greatest importance, because it produces new problems in its application."

"I would call the attention of ambitious young people to the proceedings of this conference. We have abundant evidence that organized discussion of our problems, and the sifting of opinions and ideas at five previous congresses held in other countries, bore valuable fruit in inspiration and in increased efficiency."

Medals For Veterans

Alberta Men Honored For Service In Riel Revolt

Edmonton — While an enthusiastic audience of 4,200 paid homage with applause, 27 of the early west's famous fighting men who participated in the campaign against the rebel Louis Riel in 1885 got recognition for their part in that historic struggle when they received "peace medals" given to them at the Edmonton exhibition by the Northern Alberta Pioneers' and Old-Timers' Association.

The veterans marched single file on to the stand, shoulders squared and heads erect, giving little evidence that half a century had passed since they had stood in that fashion in soldier ranks. Hon. W. L. Walsh, lieutenant-governor of Alberta, and Major General Hon. W. A. Griesbach lauded their conduct in the frontier warfare.

Alberta Elections

Date For Polling In Provincial Contest Set For Aug. 22

Edmonton, Alta. — All parties are preparing for what promises to be one of the most keenly fought campaigns in years following official announcement. Alberta provincial elections will be held Thursday, Aug. 22, with nomination day, Aug. 12.

Announcement of polling date was made by Hon. George Headley, acting premier, in the absence of Premier R. G. Reid, leader of the United Farmers of Alberta forces, which party has held power for 14 years.

Floods in northern Alberta which handicapped compilation of voters' list caused the government to postpone selecting a date until now, Mr. Headley said. However, the flood situation had not improved materially and it was decided further delay would be inadvisable, particularly in view of the prospect of an early Dominion election.

All political parties, including the newly-formed Alberta Social Credit Party, have been holding nominating conventions during the past few weeks, and it is expected more than 200 candidates will be in the running for the 63 seats in the legislature.

Severe Hail Losses

Dainchos Reported To Be Heavy In Some Alberta Areas

Calgary — Heavy hail damage to crops, in some cases reported to be 100 per cent., was caused by storms which struck several districts of southern Alberta last week. Areas hit were Stavely, Carlseland, Strathmore, Dr. Winton, Granum and MacLeod.

Severe losses were suffered at Dr. Winton as hail swept a large area around that town and continued east toward Carlseland and Strathmore. Strathmore's losses were reported to be light while at Carlseland damage was fairly heavy. Dr. Winton's losses will run between 75 and 100 per cent. over most of the district. Hailstones as large as marbles fell.

Heavy losses were feared at Stavely and Granum. Heavy rain fell over most of the southern section of the province and at Brooks it was reported to approach cloudburst proportions.

From Aldridge came a report that a severe electric storm struck the district and farmers six to eight miles south were hailed out in the heaviest hail storm in several years.

Air Mail Cachets

Inaugural Flights On Kenora-McKenzie Route Announced

Moose Jaw — Inclusion of the town of Cole on a point of call on the air mail route from Kenora-McKenzie Island-Red Lake on August 15 brings special commemorative cachets on mails to be carried on the inaugural flights, according to information received at the Moose Jaw post office.

These commemorative cachets will be "Picture Cols." "Cole-McKenzie Island," and vice-versa in each case.

Covers should be sent to the director of postal services, Winnipeg, not later than August 10.

Experimental Station Post

L. B. Thompson To Take Over Duties At Swift Current

Ottawa — L. B. Thompson, officer in charge of the Dominion range experimental station at Manyberries, Alta., has been appointed superintendent of the experimental station at Swift Current, Sask. It was announced from the agriculture department. Mr. Thompson succeeds Hon. J. G. Taggart, now minister of agriculture for Saskatchewan.

Mr. Thompson was born in New Zealand 35 years ago. He is a graduate of University of Alberta.

Grain Elevator Burned

Lethbridge — Breaking a drought spell of more than six weeks during which Lethbridge had the lowest June rainfall on record, heavy showers, amounting to cloudbursts in places, fell over the Lethbridge area. At Barons, No. 1 Pool elevator was struck by lightning and burned, with a loss of slightly over 13,000 bushels of wheat.

Ontario Needs Farm Help

Ottawa — Acute shortage of experienced farm labor on nine agricultural fronts in Ontario, with an anticipated scarcity of a tenth district, was reported to the department of labor following a Dominion-wide survey. Ontario alone stood in this category. All other provinces telegraphed local supply would meet labor demands.

Strikers At Vancouver

Men Decline To Work At Relief Camp

Vancouver — Approximately 150 relief camp men who went on strike at four camps near Hope, 80 miles from here, arrived in Vancouver by freight train.

When the men declined to work, camp authorities issued an ultimatum that they must work or leave camp. Some 50 British Columbia police were sent to the camps to enforce the ruling.

There was no trouble. The men continued to decline to work and were taken in trucks to Hope where they caught a freight. Each man was given 60 cents on leaving camp.

A delegation from the strikers waited on provincial relief officials and asked for relief. They were refused. Most of the strikers, it is reported, are members of the group which arrived in Vancouver recently from Regina.

SEEK SOME WAY TO AVERT AN ETHIOPIAN WAR

London — Anthony Eden, again in the role of peace-maker, will head Great Britain's delegation to the League of Nations council opening this week called to seek some way to avert an Italo-Ethiopian war.

Other developments in the East African situation, which British officials continued watching close were:

Malcolm MacDonald, secretary for colonies, told the commonwealth's military forces in Kenya, bordering Ethiopia and Italian Somaliland, had been "partially redistributed" in view of "possible contingencies on that frontier."

Sir Samuel Hoare, foreign secretary, replying to questioners, expressed his belief it was not necessary to reinforce the normal peace-time garrison in the Sudan.

Usually well informed quarters said Britain was ready to authorize arms shipments to Ethiopia, following receipt of communications from Emperor Haile Selassie certifying his empire's need of two shipments he had up here "for the legitimate use of the Ethiopian army."

Inspect Armament Plants

Sir William Jewitt Wants To Get At The Bottom Of Trade In Arms

London — Summoning of many distinguished British financiers and industrialists as witnesses, an inspection of Britain's armament plants, and finally nationalization of these plants were urged upon the royal commission on private manufacture and trade in arms by the Union of Democratic Control.

Theze commemorative cachets will be "Picture Cols." "Cole-McKenzie Island," and vice-versa in each case.

Covers should be sent to the director of postal services, Winnipeg, not later than August 10.

National Revenue in the Dominion Government

On Sept. 1st

Wheat Board

Expected To Commence To Function

Wheat Board

Marketing Plan For Wheat Crop Wins Approval

Saskatoon — Complaint of misrepresentation in the press of the wheat marketing legislation was made by L. C. Brouillet, president of the Saskatchewan Wheat Pool, speaking at the evening session of the convention of the United Farmers of Canada at Saskatoon. He praised the plan as likely to give a substantial reduction in interest rates on the money required and providing leadership in marketing which he held might lead to co-operation with other exporting countries.

As far as the compulsory features of the measure were concerned, they appeared just as clearly in this act as in the original bill.

There was no guarantee in the original draft of what the board would do. Under the present act if the board wished to apply these features the minister of trade and commerce could give effect to them.

The act creating the board provides the board buy wheat from the farmer at a fixed minimum price and make later payments if it is able to dispose of the wheat at prices higher than the minimum.

New Governor-General

London — Canada's next governor-general, Lord Tweedsmuir, was guest of honor at a luncheon tendered by the Canadian Chamber of Commerce. "I am warned of every variety of politics and will be for the next five years," he said smilingly. He sat as a Conservative in the House of Commons here for some years, as John Buchan, before elevation to the peerage.

Prize For Westerner

Montreal — Sydney Buckwold of Saskatoon, student in the third year of the faculty of commerce at McGill University here, has been awarded the Joseph H. Jacobs prize for accountancy. The prize is valued at \$25.

Royal Air Force Thrills Thousands

A tremendous crowd attended the annual R.A.F. display at Hendon this year to witness the best display ever put on by the daring British fliers. Here we see part of the No. 26 Squadron of Audax planes roaring over the heads of a small section of the crowd.

Two Passengers Killed

Six Others Escape When Plane Wrecked In England

London — Two persons were killed in the blazing wreckage of an airplane which crashed at the edge of Heston aerodrome after a takeoff for Spithead for the silver jubilee review of the British fleet.

The dead were two passengers, Major J. H. Hobson and N. Newhouse. The pilot and the five other passengers, including one woman, Margaret Vickers, were rushed to hospital suffering from burns and injuries.

Last Post For War Dead

London — The "Last Post" will be sounded every night in perpetuity at the memorial to British war dead and missing at Loos, thanks to Rudyard Kipling, the poet of the empire. Kipling, who had hitherto provided funds for the ceremony, decided to provide an endowment to ensure its being carried out in perpetuity.

MARKETING PLAN FOR WHEAT CROP WINS APPROVAL

MUST WORK OR BE CUT OFF RELIEF IS ONTARIO EDICT

Toronto — Premier Mitchell F. Hepburn has issued an ultimatum to unemployed in all parts of Ontario they must work or be cut off relief.

The policy of "no work, no relief" goes for every part of the province.

Hon. David Croll, minister of welfare, declared no labor troubles would be permitted in the "cash relief for work" plan under which more than \$8,000,000 has been assigned to municipal projects throughout the province.

"We've laid down a policy of 'no work, no relief,'" the premier said. "Agitators have been active among the relief workers and have done all in their power to dissuade people from working."

Strikers at Windsor's municipal woodpile held an indignation rally following the ultimatum. They decided they would stay off relief rather than work and started a collection for the "holdouts."

Alderman Ray Craft who has taken credit for calling the men out on strike, led the rally and will lead a demonstration in front of the woodyard, when efforts will be made to keep as many as possible from returning to work.

Plan To Aid Jobless

Receive Wages For Breaking Up Railways Box Cars

Toronto — Unemployed get wages, the Canadian National Railway gets its box cars broken up for nothing, and Scarborough Junction gets a supply of lumber.

That, in substance, is the ingenious scheme worked out to aid jobless in the township just east of here. The men receive wages for breaking up the old cars, instead of a relief allowance.

If addition each man on relief is given a free truckload of wood which he is allowed to select himself. And in the \$1 per load paid to truckers to carry the wood away there is money for private truck owners and to the township for upkeep of its own trucks.

Approximately 1,500 men have had at least a few days work for the six weeks the project has been operating. The railway has 500 box cars to be demolished. Already 180 have been disposed of.

Upwards of 250 men are employed in one day. They are paid 50 cents an hour by the township, and report every two weeks for work. Each is entitled to as much work as his relief allowance would amount in wages.

Recovery In Australia

Premier Lyons Tells Of Methods Taken To Cut Expenses

Vancouver — Everybody had to take a "cut" to help Australia get on her feet economically, Prime Minister Joseph Lyons of that dominion said during a brief stay here.

The bondholders had to take less, the public servants had to accept reductions, the taxpayer had to pay a bit more," he said. "Since the turning point in 1932 we have been able to lighten those burdens. The public servants on the lower levels have had their pay restored; the taxpayer had his burden lightened. We have cut the land tax in half to help the farmers. Recovery in Australia is not complete, but it continues."

Aerial Cruiser

Largest Land Plane Ever Assembled Awaits Tests In U.S.

Seattle — A giant aerial battle cruiser, described by its builders as the largest land plane ever assembled in the United States, awaited tests here before being submitted to the army corps.

The 35-ton ship, with its huge mid-wing spread of 105 feet and an overall length of 70 feet, is powered with four 725-horsepower motors, equipped with automatic variable pitch constant speed propellers. It is reported capable of flying from 200 to 250 miles an hour.

Victims Of Chinese Flood

Hankow, China — Unofficial reports from Tienmen, Hopeh province, said 14,000 bodies had been recovered from the flooded Han river. These advices said 4,000 refugees had been rescued from tree-tops in that vicinity. Tienmen is 75 miles west of Hankow.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties having a holiday or short trip, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Hundreds of people spent the greater part of Sunday last at or near Crows' Nest Lake.

Mr. and Mrs. J. McPhail and son Harold are Lethbridge visitors this week.

Mr. and Mrs. George Brown returned Saturday from an enjoyable two weeks holiday at Crows' Nest Lake.

Mr. and Mrs. John Kubik, of the Blairmore Grocery, returned Friday night last from a motor trip to Banff and back, via Calgary.

Miss May Bennett, who had been visiting for a few days with her father at the Rock Creek Hereford Ranch, returned Sunday to Calgary.

Rev. Levi Curtis, D.D., superintendent of education in Newfoundland for the past 36 years, has retired. He is now seventy-seven.

An exchange, referring to chilled turkeys, made it read "child turkeys." Well, no damage was done. Who wants the old hen, anyhow?

Mrs. A. E. Larke and children will leave for Nelson on Monday, July 29th, where they will holiday for a few weeks.

Quite a number of Blairmore people were visitors to Lethbridge this week, taking in the exhibition and stampede, which celebrated the 50th anniversary of that city.

Just one vote was necessary to select sixty-three candidates for Social Credit. Why not Aberhart limit their election to parliament to his one vote.

R. Mills and family were visitors to Lethbridge and Taber the early part of the week. Yesterday they proceeded west for the balance of their vacation.

Mr. and Mrs. Gibbs arrived at Bellevue last week on a visit to their daughter and son-in-law, Rev. and Mrs. Upton. They visited Blairmore on Thursday last.

Ed. Womersley, of the Blairmore football team, and Jimmie Anderson, of the Coleman lineup, sustained slight injuries in the game at Crows' Nest on Saturday evening.

Ed. Royle, L.I.S.M., presided at the organ at All Saints Anglican church at Waterton Lakes on Sunday, the officiating clergyman being Canon Middleton.

Liberals made a clean sweep in Prince Edward Island. It was clean, for there wasn't a speck of the previous administration left to say "Hello!"

For making an uncomplimentary remark over in Austria, an Alberta (Canadian to wit) was sentenced to eighteen weeks in jail. Austrians can say lots over here and get away with it.

A fish reduction plant is in operation on Vancouver Island. We have seen persons serving their apprenticeships along the North Fork river, with the same object in view—but, oh, what luck!

Mr. S. E. Low, Stirling school principal, addressed a Social Credit meeting here on Wednesday night of last week. As the meeting was not well advertised, the attendance was not as large as could be expected.

Adam D. Rae, father of Mrs. George E. Church and Mrs. D. C. Church (formerly Miss Mary Rae, of the Blairmore teaching staff), of Balzac, died in the Sutherland Memorial Hospital in Picton, Nova Scotia, on July the 8th, aged 78. Besides the two daughters mentioned above, three other daughters and one son survive.
